Summary	AI/ML Engineer with 1 year 6 months of experience in building machine learning models and Generative AI applications. Developed ML models for real-world use cases and built GenAI solutions using LangChain and RAG. Strong in Python with a focus on building practical, user-friendly AI systems	
Experience	Autorox AI Engineer (Generative AI) Developed an ML system for garage owners to estimate service cost and completion time using customer inputs and historical data. Built a chatbot using Microsoft Copilot Studio to automatically collect post-service customer feedback. Designed and optimized React.js applications, modernizing UI with Bootstrap upgrades and converting web apps to mobile using Capacitor (Android/iOS). Enhanced user experience through UI improvements, bug fixes, and responsive design across devices.	18-05-2024 to 5-12-2025 Gachibowli

Projects	Chatbot Using LangChain and Ollama Developed a GenAI chatbot interface using LangChain prompt chaining, Ollama LLMs, and Streamlit UI. Enabled real-time user interaction with a locally hosted Gemma 4B model for fast and private inference. https://github.com/praveendosani1107-arch/Chatbot-Using-LangChain-and-Ollama House Price Prediction Developed a House Price Prediction system using Linear Regression, trained on a housing dataset. Applied data preprocessing and evaluated model performance to predict property prices effectively. https://github.com/praveendosani1107-arch/House-Price-Prediction/edit/main/READ...
