

PRAVEEN KUMAR

✉praveenkumardosani42@gmail.com ☎8688384248 📍hyderabad

Summary

Python Developer with hands-on experience in FastAPI, SQL, and AI/ML applications using LangChain, FAISS, and Google Gemini API. Skilled in developing REST APIs, RAG-based solutions, and vector search applications. Passionate about building scalable and efficient software solutions.

Experience

Trysol

AI/GenAI Developer

Gachibowli

Apr 2025 – Present

Intelligent RAG_Based Document Question Answering

Technologies: Python, LangChain, FAISS, Google Gemini

- Developed a Retrieval-Augmented Generation (RAG) application using Python, LangChain, Google Gemini, and FAISS for document-based question answering.
- Implemented document chunking, embeddings, semantic search, and integrated Google Gemini to generate context-aware answers and document summaries.

AI_Powered SQL Database Agent

Technologies: Python, LangGraph, LangChain, SQL, Google Gemini

- Developed an AI-powered SQL Database Agent using Python, LangChain, LangGraph, SQL, and Google Gemini f natural language to SQL conversion with automated query execution

Authorox

Developer

Gachibowli

Nov 2024 – Dec 2025

- Developed and maintained frontend applications using **React.js**, implementing responsive and user-friendly interfaces.
- Upgraded the application from an older React version to the latest version, migrated legacy code, and resolved compatibility issues.
- Built reusable UI components and implemented new features based on business requirements.
- Developed RESTful APIs using **Python** and **FastAPI**, implementing business logic and database integration.
- Integrated frontend applications with backend APIs to enable seamless data exchange and application functionality.

Projects

AI-Powered PDF Question Answering System (RAG with Pinecone & OpenAI)

Built an end-to-end RAG (Retrieval-Augmented Generation) system to answer questions from PDF documents using AI. Developed a document processing pipeline to extract PDF content, split text into smaller chunks, generate embeddings for semantic understanding, and store them in the Pinecone vector database. Implemented semantic search to retrieve relevant information based on meaning instead of keywords and integrated OpenAI LLM to generate accurate, context-aware responses from the retrieved data.

Chatbot Using LangChain & Ollama | Python, LangChain, Ollama

Built a conversational AI chatbot using local LLMs

- Built an interactive AI application using LangChain and Ollama for natural language processing tasks
- Designed prompt templates to generate clear and structured responses from large language models
- Integrated Streamlit to create a simple and user-friendly web interface for real-time interaction
- Implemented output parsing to control and format model responses effectively
- Developed a modular pipeline using chaining (prompt → model → parser) for scalable AI workflows

skills.

🔗 **Programming Languages:** Python, JavaScript, SQL

🔗 **Frontend Technologies:** HTML5, CSS3, React.js

🔗 **Backend Frameworks:** FastAPI

🔗 **AI & LLM Frameworks:** AI Agents, Agentic AI ,LangChain, LangGraph, LangSmith

🔗 **Vector Databases:** FAISS, ChromaDB, Pinecone

🔗 **LLM & AI:** Google Gemini API, Prompt Engineering, RAG, LLM, Embeddings

🔗 **Search Techniques:** Vector Search, Similarity Search, Semantic Search, Hybrid Search, Document Retrieval
