Experience

AutoroX	Gachibowli
Project Experience	Aug 2024– Dec 2025
• Built an end-to-end RAG (Retrieval-Augmented Generation) system using Python, FAISS, LangChain, and Gemini AI. The project extracts text from PDF documents, performs text cleaning and chunking, generates embeddings using Gemini Embedding models, and stores vectors in a FAISS vector database for efficient similarity search. It supports both document summarization and question-answering by retrieving relevant chunks and generating accurate responses using the Gemini 2.5 Flash model • Developed a responsive and dynamic frontend application using React.js and Bootstrap with modern, reusable component-based architecture. Designed interactive and user-friendly UI screens with improved responsiveness across desktop, tablet, and mobile devices. Enhanced application performance and user experience by implementing efficient React state management and optimized rendering techniques. Upgraded Bootstrap from version 3.7 to 5.3.7 and migrated legacy UI components to support modern layouts, responsive utilities, and updated styling standards. Identified and fixed multiple UI bugs, responsiveness issues, and compatibility problems to improve overall application stability and maintainability.	

Education

St. Martin's Engineering College	B.Tech • 75%
Electronics and Communication Engineering (ECE)	Kompally, Hyderabad • 2020-2024

Projects

Chatbot Using LangChain & Ollama Python, LangChain, Ollama
Built a conversational AI chatbot using local LLMs
• Built an interactive AI application using LangChain and Ollama for natural language processing tasks • Designed prompt templates to generate clear and structured responses from large language models • Integrated Streamlit to create a simple and user-friendly web interface for real-time interaction • Implemented output parsing to control and format model responses effectively • Developed a modular pipeline using chaining (prompt → model → parser) for scalable AI workflows

Skills

Generative AI & LLMs
LangChain, LangGraph, RAG (Retrieval-Augmented Generation), FAISS, Pinecone, Prompt Engineering, AI Agents, Agentic AI
Programming & Web
Python, JavaScript, React.js, HTML5, CSS3
Databases
PostgreSQL, SSMS Vector Databases
Concepts
API Integration, Semantic Search, Embeddings, Chunking Strategies, Vector Databases, LLM Integration, Similarity Search, Prompt Engineering
